Executive Summary

This comprehensive catalogue outlines high-impact AI integration services across 15 critical business domains. From automating sales pipelines to deploying autonomous voice agents, these solutions are designed to deliver measurable ROI, reduce operational costs, and create scalable growth systems for modern enterprises.

1. Sales & Lead Generation Automation

1.1 — AI Lead Engine Setup

"From 0 to 1,000+ qualified leads — on autopilot"

PROBLEM SOLVED: Manual lead generation is killing sales team productivity.

BUILD:

- 1,000+ lead scraper using Clay + Bardeen + Apollo
- Auto-enrichment pipeline (company size, tech stack, intent signals)
- Lead scoring model integrated into their CRM
- Automated list segmentation by ICP

OUTCOME: 10–20 hours/week saved; 3x pipeline volume.

Tools: Clay, Bardeen, Gumloop, Make, Zapier, HubSpot, Attio

1.2 — Smart Outreach Automation Bot

"Personalized outreach at scale — without sounding like a robot"

PROBLEM SOLVED: Generic outreach that gets ignored; no consistent follow-up cadence.

BUILD:

- Automated multi-channel outreach sequences (email + LinkedIn)
- AI-personalization engine using prospect data
- Smart reply detection and routing
- A/B testing framework for subject lines and CTAs

OUTCOME: Reply rates up 3–5x; sales cycle shortened by 30%.

Tools: Clay, HubSpot, Make, Relevance AI, Zapier, Claude/GPT

1.3 — Sales Funnel Intelligence Dashboard

"Know exactly where every deal stands — and what to do next"

PROBLEM SOLVED: No visibility into funnel health, conversion rates, or bottlenecks.

BUILD:

- Real-time sales pipeline BI dashboard
- Conversion rate tracking at every funnel stage
- AI-powered deal risk detection
- Weekly automated executive sales report

Tools: Mixpanel, Metabase, PostHog, HubSpot, Make, Claude

2. Content & Marketing Inefficiency

2.1 — 30-Day Content Engine

"A full month of content — written, designed, and scheduled — in 48 hours"

PROBLEM SOLVED: Businesses fall behind on content consistency.

BUILD:

- Automated content calendar generation
- AI content creation pipeline (Jasper + Claude)
- AI visual creation (Midjourney)
- Short-form video automation (Opus Clip)
- Auto-scheduling to all platforms

OUTCOME: Content costs reduced 60–70%; posting frequency 5–10x.

Tools: Jasper, Midjourney, Opus Clip, Make, Zapier, InVideo, Crayo

2.2 — Viral Video Campaign Machine

"Turn one video into 50 pieces of content automatically"

PROBLEM SOLVED: Great knowledge but zero time or budget for video.

BUILD:

- Long-form video → clips, reels, shorts automation
- AI voiceover and caption generation
- Platform-specific formatting
- Content repurposing into newsletters and blogs

Tools: Opus Clip, InVideo, Crayo, Jasper, Make

2.3 — AI Ad Creative Engine

"20 fresh, performance-ready ads every month — without a design team"

PROBLEM SOLVED: Ad creative fatigue, expensive design agencies.

BUILD:

- Monthly batch of 20+ ad creative variants
- A/B testing framework with performance tracking
- Competitor creative monitoring
- Brand voice consistency layer

2.4 — SEO & Content Intelligence System

"Know exactly what to write, when to write it, and why it will rank"

PROBLEM SOLVED: Generic AI content hurting SEO.

BUILD:

- AI-powered keyword clustering
- Competitor content gap analysis
- Content performance tracking dashboard
- AI-assisted writing with human expert layer

3. Operations & Workflow Automation

3.1 — Business Automation Audit & Roadmap

"Find out exactly where you're losing time and money — and how to stop it"

PROBLEM SOLVED: Don't know where to start with automation.

DELIVERABLES:

- Full audit of current tools and workflows
- Time-and-cost waste analysis
- Prioritized automation roadmap
- ROI projections for each automation & Tool recommendations

3.2 — Operational Automation Stack Build

"Connect all your tools. Automate the gaps. Get your time back."

PROBLEM SOLVED: Disconnected tools creating manual work.

BUILD:

- Custom automation workflows
- Lead-to-sale automation
- Notification and escalation systems
- Error handling and alerting
- SOP-to-automation translation

OUTCOME: 15–25 hours/week saved; zero missed handoffs.

Tools: Zapier, Make, n8n, Gumloop, Relevance AI

3.3 — Executive BI Dashboard + Automated Reporting

"Your business dashboard — real-time data, zero manual effort"

PROBLEM SOLVED: Wasting hours weekly building spreadsheet reports.

BUILD:

- Real-time business intelligence dashboard
- Automated weekly/monthly executive reports
- LLM-powered insights and recommendations
- Slack/email delivery of key alerts

Tools: Mixpanel, PostHog, Metabase, Amplitude, Make, Claude/ChatGPT

4. Customer Service & Support Automation

4.1 — AI Customer Support Agent Build

"24/7 support — without hiring a single new agent"

PROBLEM SOLVED: Overwhelmed support teams, after-hours query abandonment.

BUILD:

- Custom AI chatbot trained on company knowledge base
- Multi-channel deployment (website, WhatsApp, email, social)
- Smart escalation logic (AI handles Tier 1; humans handle Tier 2+)
- CRM integration & Sentiment detection

OUTCOME: 60–70% ticket deflection; 24/7 coverage; 30% cost reduction.

Tools: SmythOS, CrewAI, Flowise, Langflow, Supabase, Pinecone, HubSpot

4.2 — Self-Service Knowledge Hub

"Let customers help themselves — and love you for it"

PROBLEM SOLVED: Customers can't find answers.

BUILD:

- AI-powered knowledge base
- Auto-populated from existing docs
- Embedded in website/app
- Analytics on most-searched topics

5. CRM & Data Intelligence

5.1 — Intelligent CRM System Build

"A CRM that updates itself, enriches itself, and tells you who to call next"

PROBLEM SOLVED: Dead CRM data; manual updates.

BUILD:

- CRM setup or migration
- Auto-enrichment pipeline
- Automated contact and deal updates
- AI-powered next-action recommendations
- Lead scoring model embedded

OUTCOME: CRM accuracy from ~40% to 95%+.

Tools: HubSpot, Attio, Folk, Clay, Bardeen, Make, Zapier

5.2 — Data Ecosystem Integration

"One source of truth — across every tool your business uses"

PROBLEM SOLVED: Data siloed in 10+ tools.

BUILD:

- Integration architecture
- Unified customer data profile
- Automated data sync and deduplication
- Real-time triggers based on customer behavior

6. No-Code Products & Internal Tools

6.1 — MVP in 48 Hours

"Validate your idea, build your product, launch — this week"

PROBLEM SOLVED: Spending 6–12 months and \$50k+ before validating.

BUILD:

- Full-stack web app or SaaS MVP
- AI features natively integrated
- Database + auth + payments connected
- Launch-ready in 48–72 hours

Tools: Lovable, Bolt.new, Cursor, v0.dev, Replit, Supabase, Vercel

6.2 — Internal Tool Development
